## PROJECTS

### Herbal HealthCare

- **Technologies : PHP, HTML**
- The project promotes holistic wellness with natural remedies, online appointments, and easy herbal shopping. It focuses on minimal side effects, guiding users to beneficial herbs and fruits for tailored health needs and sustainable healthcare practices.

### GO-BETWEEN

- **Technologies : JSP, HTML, Java, Android**
- This project aims to modernize logistics using digital tools, optimizing processes for efficiency and eco-friendliness. By focusing on inventory, routes, and real-time tracking, we enhance customer experiences and maximize resource utilization.
